Online Respirator Fit Tester Training

Respirator fit testing vendors can often be costly, inconvenient, and inexperienced. Do it yourself! Our convenient online training provides certification in establishing a respiratory protection program, training workers, and providing respirator fit testing. Course graduates will understand what is involved with complying with the OSHA respiratory protection standard, 29 CFR 1910.134, and AIHA/ANSI Z88.10-2010. Completion will generally require a total of 2 hours. This course also includes a training outline, wallet card templates, and training form. Recertification is not required.

After Completing Training, Users Will:

- Know OSHA approved quantitative and qualitative fit testing methods.
- Understand respirator types (NIOSH approved).
- Know record-keeping requirements.
- Comprehend respiratory protection program requirements.
- Know how to meet training requirements.
- Identify medical requirements and precautions for wearing a respirator.
- Identify the steps for donning / doffing a respirator, and for performing a user seal check.

✓ Respirator fit tester training, starting at \$120.

✓ Manage medical evaluations & fit testing records all in one place.
